

Application Serial No.: 09/825,470
Amendment and Response to September 16, 2005 Final Office Action

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently amended) A computer-implemented method for managing risk related to a legal action involving a person, the method comprising:
receiving, into a computer memory, information identifying a person's status as at least one of a party to a legal action and an amicus curiae of the court in a pending legal action;

receiving, into the computer memory, information relating to a plurality of risk assessment factors associated with details of the legal action;

~~structuring, using a computer processor operatively attached to the computer memory, the received information relating to details of the legal action according to predetermined criteria;~~

assigning a numerical value to each of the plurality of risk assessment factors, wherein the numerical value is indicative of a legal risk of each risk assessment factor relative to the other plurality of risk assessment factors;

assigning a weight to each of the plurality of risk assessment factors;

~~generating calculating, using the computer processor, a plurality of risk factor values by multiplying the numerical value and the weight assigned to each of the plurality of risk assessment factors sealed numeric value or a sealed alphanumeric value indicative of an amount of risk associated with the legal action wherein the sealed numeric value or sealed alphanumeric value is based upon at least a portion of the structured information;~~

calculating a risk quotient for the legal action by summing the plurality of risk factor values; and

in response to the calculated risk quotient, generating a suggested action associated with the legal action, report comprising the sealed numeric or alphanumeric

Application Serial No.: 09/825,470
Amendment and Response to September 16, 2005 Final Office Action

~~value and at least the portion of the structured information upon which the scaled numeric or alphanumeric value is based.~~

2. (Currently Amended) The method of claim 1, further comprising generating a report including the suggested action responsive to the scaled numeric value or a scaled alphanumeric value.

3-5. (Canceled)

6. (Currently amended) The method of claim 12, wherein the suggested action is directed towards reducing a risk related to the a-legal action.

7. (Currently Amended) The method of claim 1 2 wherein the suggested action comprises commencing a litigation.

8. (Currently Amended) The method of claim 12 wherein the suggested action comprises entering arbitration.

9. (Currently Amended) The method of claim 12, wherein the suggested action comprises settling a legal action.

10. (Canceled)

11. (Currently Amended) The method of claim 1, wherein at least one of the plurality of risk assessment factors the received information comprises is associated with a venue for- the legal action.

12. (Currently Amended) The method of claim 1, wherein the received information relating to the plurality of risk assessment factors is gathered electronically.

13. (Currently Amended) The method of claim 1, further comprising aggregating a plurality of risk quotient ~~sealed numerical or alphanumeric values~~ relating to the person and ~~determining~~ ~~assessing~~ an aggregate level of risk related to multiple legal actions to which the person is a party.

14. (Currently Amended) The method of claim 13, further comprising calculating an average ~~sealed numeric value or a sealed alphanumeric value~~ associated with the person.

15. (Original) The method of claim 1, wherein the legal action comprises a class action suit.

16. (Currently Amended) A computerized system for managing risk associated with a legal action, the system comprising:

a computer server accessible by a network access device via a communications network; and

executable software stored on the server and when executed operative with the server to cause the system to:

receive information identifying a person as at least one of a party to a legal action and an amicus curiae of the court;

receive information relating to ~~details of a plurality of risk assessment~~ factors associated with the legal action;

assign a numerical value to each of the plurality of risk assessment factors, wherein the numerical value is indicative of a legal risk of each risk assessment factor relative to the other plurality of risk assessment factors;

assign a weight to each of the plurality of risk assessment factors;

calculate a plurality of risk factor values by multiplying the numerical value and the weight assigned to each of the plurality of risk assessment factors;

Application Serial No.: 09/825,470
Amendment and Response to September 16, 2005 Final Office Action

calculate a risk quotient for the legal action by summing the plurality of risk factor values; and

generate, in response to the calculated risk quotient, a suggested action associated with the legal action.

~~structure the information received relating to details of the legal action according to predetermined criteria;~~

~~generate a scaled numeric or alphanumeric value indicative of an amount of risk associated with the legal action; and~~

~~generate a report comprising the scaled numeric or alphanumeric value and at least a portion of the structured information upon which the scaled numeric or alphanumeric value is based.~~

17. (Currently Amended) The computerized system of claim 16 wherein the information relating to the plurality of risk assessment factors is received via an electronic feed.

18. (Original) The computerized system of claim 16 wherein the network access device is a personal computer.

19. (Original) The computerized system of claim 16 wherein the network access device is a wireless handheld device.

20. (Currently Amended) Computer executable program code residing on a computer-readable medium, the program code comprising instructions for causing a computer to:

receive information identifying a person as at least one of a party to a legal action and an amicus curiae of the court;

receive information relating to details of a plurality of risk assessment factors associated with the legal action;

Application Serial No.: 09/825,470
Amendment and Response to September 16, 2005 Final Office Action

assign a numerical value to each of the plurality of risk assessment factors,
wherein the numerical value is indicative of a legal risk of each risk assessment factor
relative to the other plurality of risk assessment factors;

assign a weight to each of the plurality of risk assessment factors;

calculate a plurality of risk factor values by multiplying the numerical value and
the weight assigned to each of the plurality of risk assessment factors; ;

calculate a risk quotient for the legal action by summing the plurality of risk factor
values; and

generate, in response to the calculated risk quotient, a suggested action
associated with the legal action.

~~structure the information received relating to details of the legal action according~~
~~to predetermined criteria;~~

~~generate using a computer processor, a scaled numeric or alphanumeric value~~
~~indicative of an amount of risk associated with the legal action; and~~

~~generate a report comprising the scaled numeric or alphanumeric value and at~~
~~least a portion of the structured information upon which the scaled numeric or~~
~~alphanumeric value is based.~~

21-23. (Cancelled)

24. (Previously Presented) The method of claim 1 wherein a person involved in a legal action comprises at least one of a legal person or natural person, or a combination of both.

25. (Previously Presented) The method of claim 24, wherein a legal person further comprises a governmental entity.

26. (Currently Amended) The method of claim 12 wherein the suggested action comprises appearing as an amicus curiae of the court in a litigation.

Application Serial No.: 09/825,470
Amendment and Response to September 16, 2005 Final Office Action

**27. (Currently Amended) The method of claim 12 wherein the risk
comprises legal, regulatory, financial and reputational exposure.**
